Did you know that When it snows out  
Each little flake has a different shape? Each one's unique just like you and me  
'Cause being yourself is the way to be So rock with it, DJ can spin it  
It's a world mash-up, all of us are in it

Come on over after school You're unique and that's so cool  
What's special about you Helps me see what's special about me  
Sing it out, sing it loud, come on, clap along And then turn around  
Call it the snowflake song

Wait a minute I think I get it What makes us cool is  
What makes us different We come from different places  
We wear different faces I like Velcro but you like laces  
So let's rock with it, DJ can spin it It's a world mash-up, all of us are in it

Come on over after school  
You're unique and that's so cool  
What's special about you  
Helps me see what's special about me  
Sing it out, sing it loud, come on, clap along  
And then turn around  
Call it the snowflake song

One more time, you'll be you, I'll be me And together we will see

What's special about you helps me see What's special about me  
'Cause everyone is special

What's special about you helps me see What's special about me  
'Cause everyone is special

Come on over after school You're unique and that's so cool  
What's special about you Helps me see what's special about me  
Sing it out, sing it loud, come on, clap along And then turn around  
One more time, you'll be you, I'll be me And together we will see  
'Cause everyone is special
