VERSE 1

You see the sun, it's givin' off some heat
Warmin' things up, it's puttin' out some steam
It's just makin' some clouds to start a rainy day
It's gonna shower this world and it'll be a better place

CHORUS

'Cause what goes around comes around
You can start a revolution by the way that you give
What goes around comes around
You can never really lose if you help somebody win
What goes around comes around
What goes around comes back around again

VERSE 2

You see that guy, he's puttin' out some dough
Givin' it away, yeah, he's lettin' it go
He's helpin' a friend find a better way
He's gonna shower this world and it'll be a better place

CHORUS

'Cause what goes around comes around
You can start a revolution by the way that you give
What goes around comes around
You can never really lose if you help somebody win
What goes around comes around
What goes around comes back around again

BRIDGE

What goes around comes back around
And what goes around comes back around
And what goes around comes back around again

CHORUS (repeats)
